March 23, 2010

www.meritalk.com

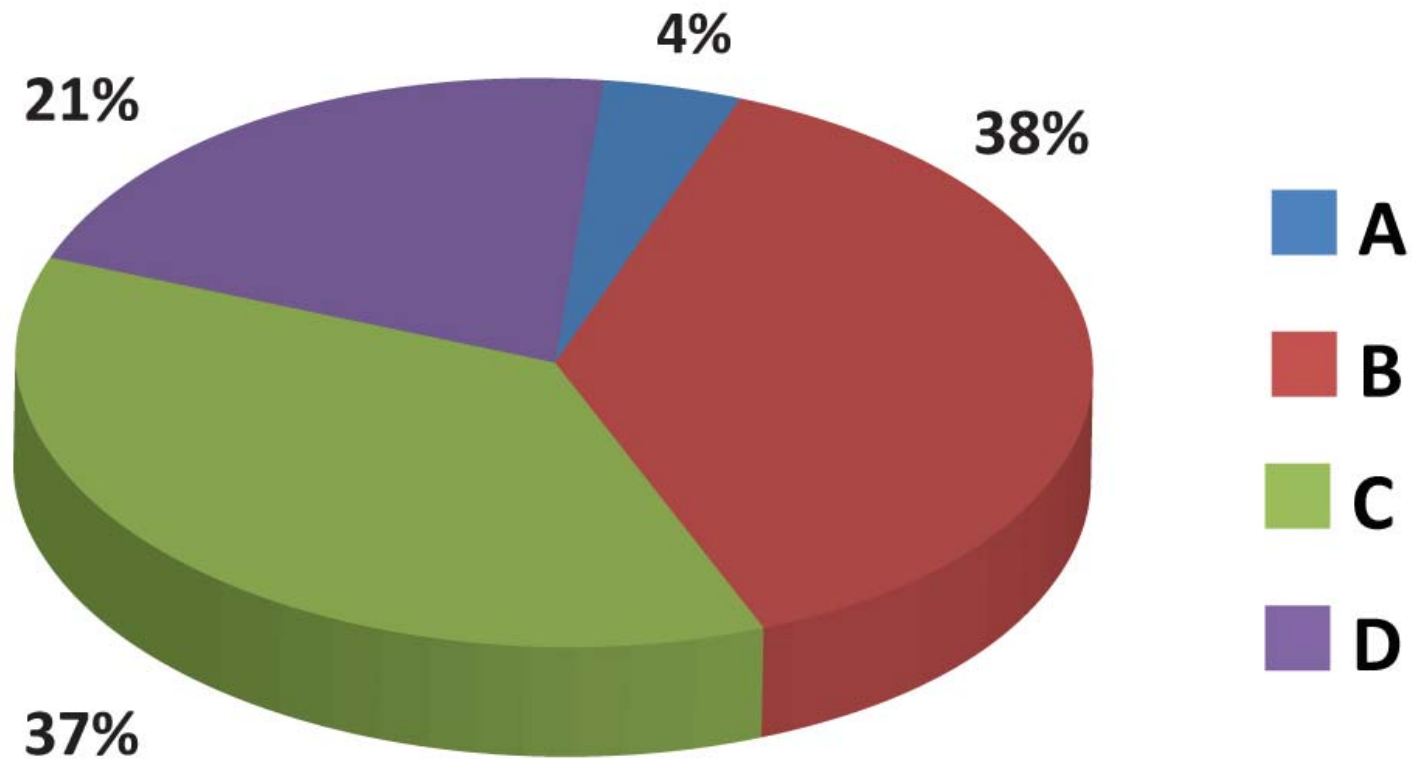

Do you think that government is more open today than when President Obama took office?

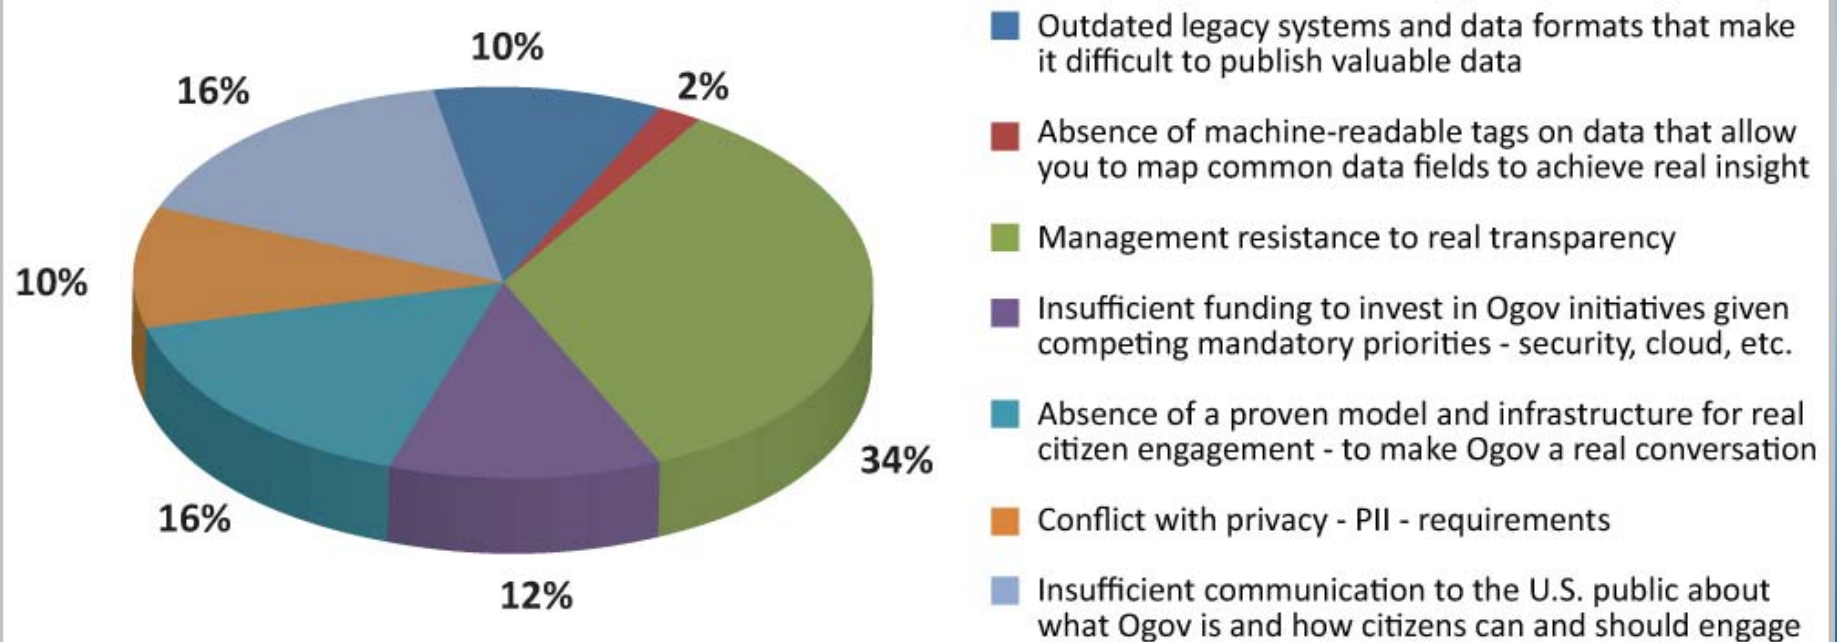

Do you feel that Ogov is providing you with a voice in how government works?

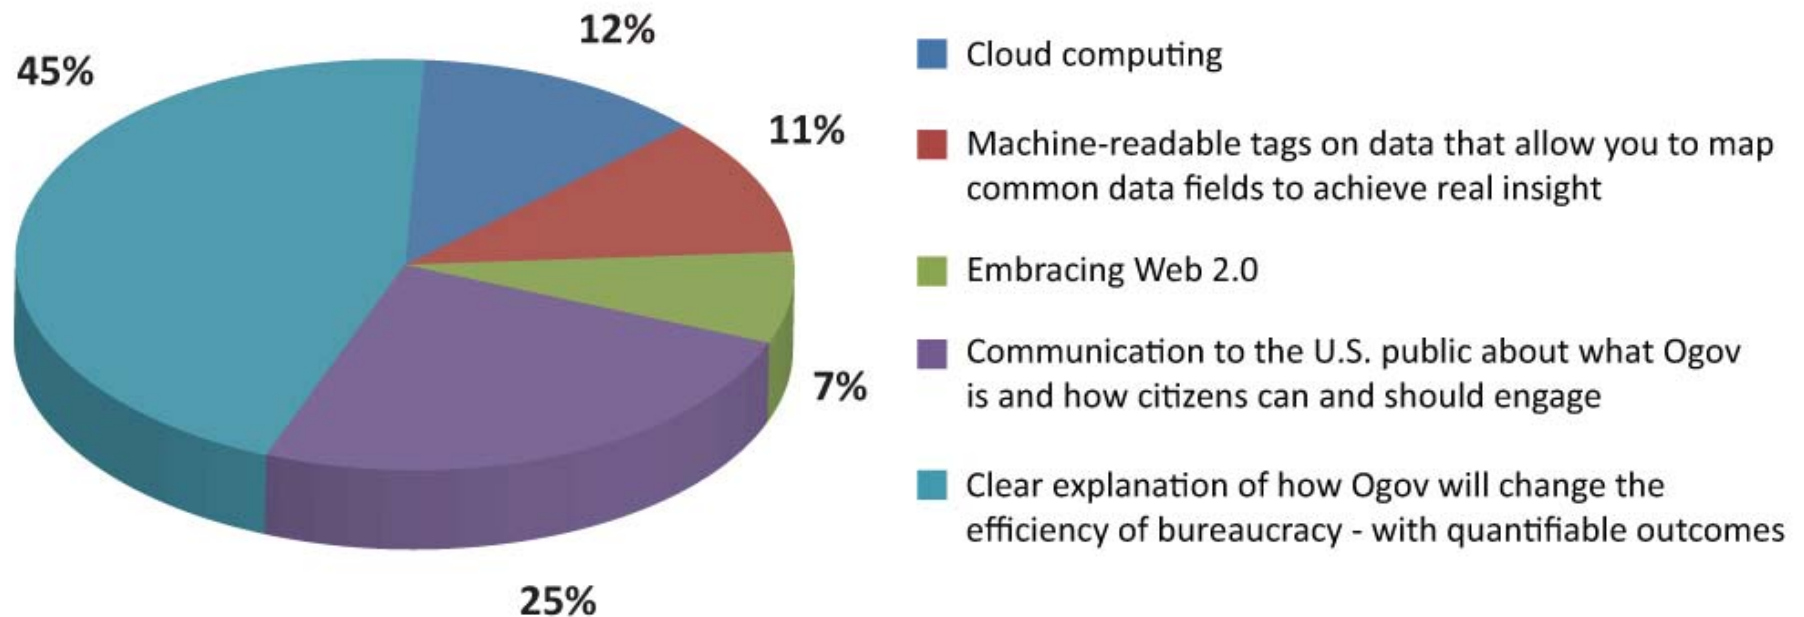

How would you grade the OMB's IT Dashboard?

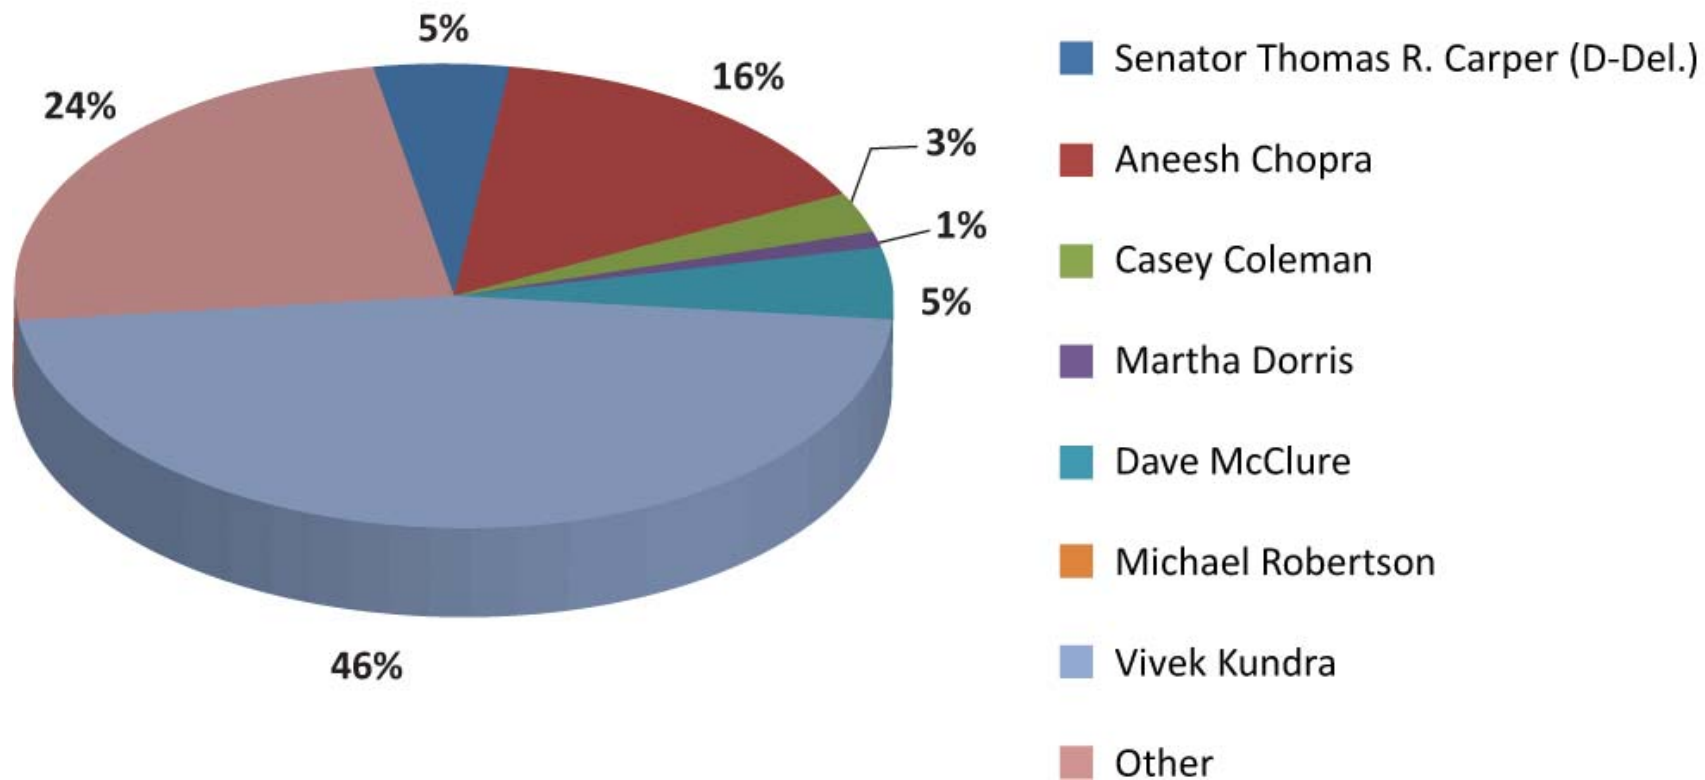

What are the biggest challenges that Ogov initiatives will have to overcome in the Federal government?

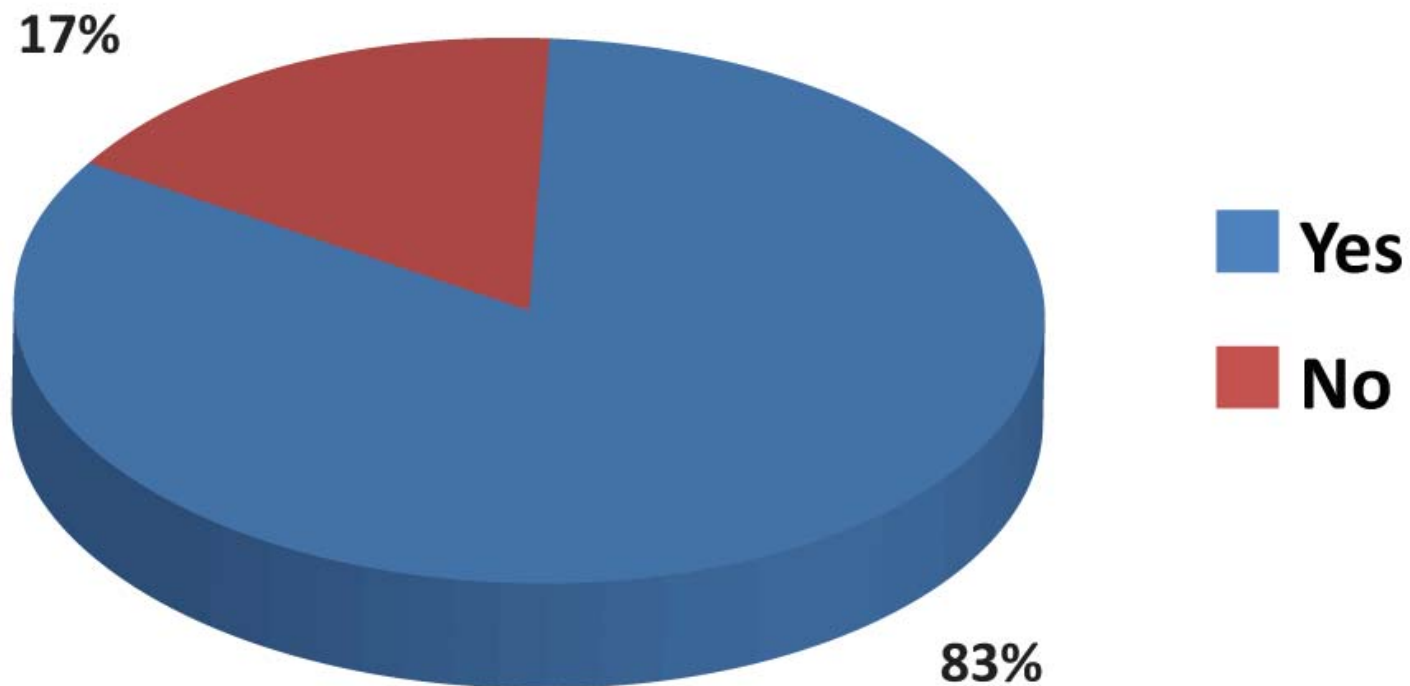

What are the biggest opportunities that Ogov can leverage to fundamentally change the way government operates?

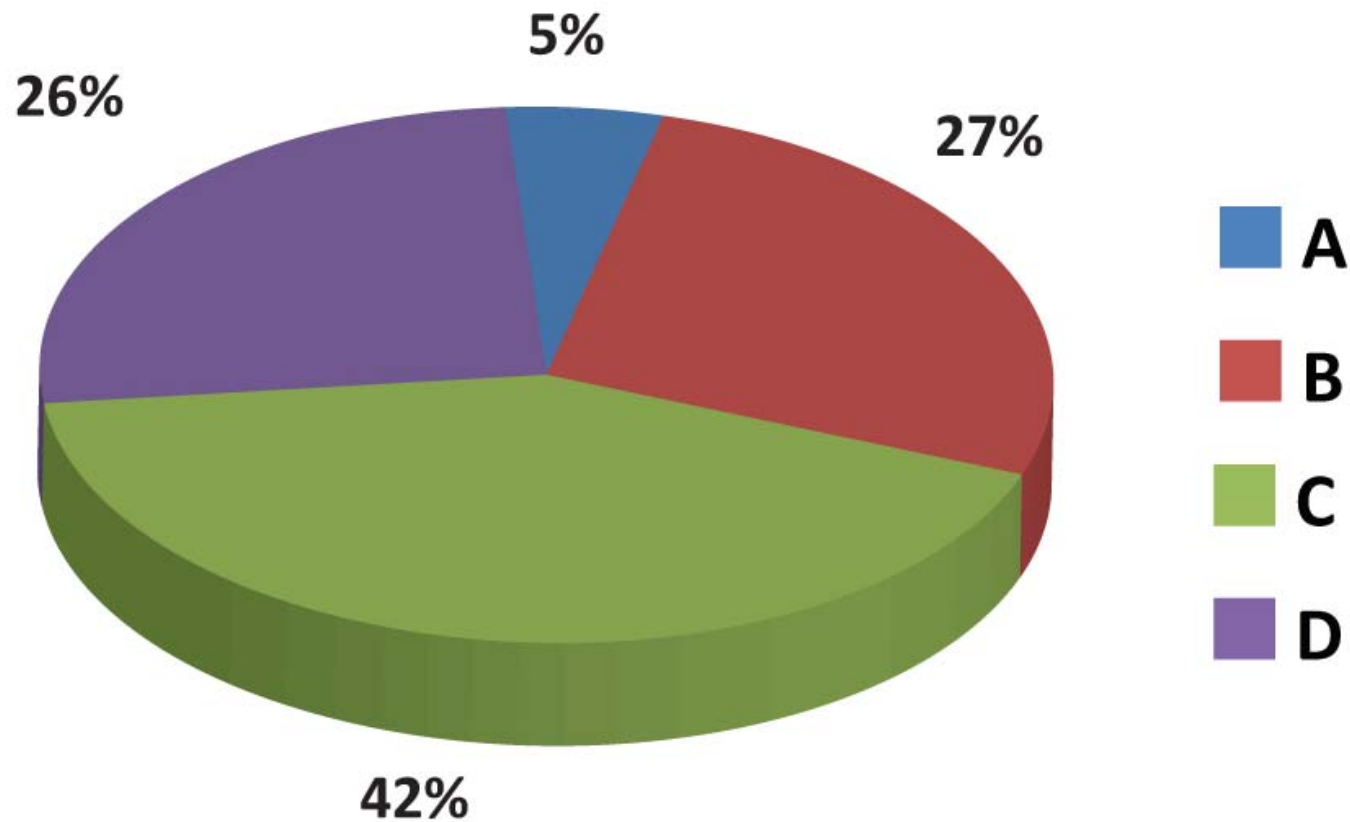

Who in the government is responsible for the Ogov Directive?

Should the government execute research to identify what citizens like/dislike and want/need in Ogov?

How would you grade the clarity of OMB guidance on what agencies should do to achieve Ogov goals?

Thank You
