

# Navigating Network Complexity

## Feds are struggling with complexity.

### And with good reason:

**81%**

of network managers believe that network complexity can slow or halt IT performance objectives

Agencies with more complex networks are nearly

**3x** more likely than others to experience frequent network disruptions.

### How can agencies simplify their networks?

Move to open, non-proprietary standards

### Simplification Saves Agencies Money...

Agencies believe they could save, on average, **18%** of their IT budgets by reducing network complexity by half – that's

**\$14.8B** annually government-wide

### ...and Offers Many Benefits

**59%**  
Improved network reliability

**55%**  
Improved network speed

**54%**  
Improved security

**42%**  
Streamlined maintenance

**37%**  
Improved IT agility to better support the mission
